

MOTHER TERESA WOMEN'S UNIVERSITY

KODAIKANAL – 624 102

**BACHELOR OF SCIENCE
BCA
UNDER CBCS (with effect from 2018-2019)**

BACHELOR OF SCIENCE
BCA
UNDER CBCS (with effect from 2018-2019)

OBJECTIVES

1. To produce employable Computer Professionals who have sound knowledge of Computer Applications and business fundamentals that can be applied to develop and customize solutions for Small and Medium Enterprises (SME).
2. To develop academically competent and professionally motivated personnel, equipped with objective, critical thinking, right moral and ethical values that compassionately foster the scientific temper with a sense of social responsibility.
3. To develop skilled manpower in the various areas of information technology like:
Data base management, Software Development, Computer-Languages, Software engineering, Web based applications etc.

PROGRAMME SPECIFIC OUTCOMES

- PSO1: The necessary technical, scientific as well as basic managerial and financial procedures to analyze and solve real world problems within their work domain
- PSO2 : Clarity on both conceptual and application oriented skills in commerce, Finance & Accounting and IT Applications in Business context.
- PSO3: Improved communication and business management skills, especially in providing tech support.
- PSO4: Awareness on ethics, values, sustainability and creativity aspects.
- PSO5: The ability and the mindset to continuously update and innovate.

MOTHER TERESA WOMEN'S UNIVERSITY, KODAIKANAL

BCA

ALLOCATION OF PAPERS AND CREDITS FOR UG PROGRAMME

EFFECT FROM - 2018-2019 ACADEMIC YEAR ONWARDS

S.No	Subject Code	Subject Name	Hours	Credits	CIS	ESE	Total
SEMESTER – I							
1.	ULTA11	Tamil	6	3	25	75	100
2.	ULEN11	English	6	3	25	75	100
3.	UCAT11	Programming in C	5	4	25	75	100
4.	UCAT12	Computer Fundamentals & Problem Solving	5	4	25	75	100
5.	UCAA11	Digital Principles	5	4	25	75	100
6.	UVAE11	Value Education	3	3	25	75	100
Total			30	21			600
SEMESTER – II							
7.	ULTA22	Tamil	6	3	25	75	100
8.	ULEN22	English	6	3	25	75	100
9.	UCAT21	Programming using C++	6	4	25	75	100
10.	UCAP21	Programming in C & C++ Lab	5	4	25	75	100
11.	UCAA21	VB - Lab	5	4	25	75	100
12.	UEVS21	EVS	2	2	25	75	100
Total			30	20			600
SEMESTER – III							
13.	ULTA33	Tamil	6	3	25	75	100
14.	ULEN33	English	6	3	25	75	100
15.	UCAT31	RDBMS	5	4	25	75	100
16.	UCAA32	RDBMS Lab	5	4	25	75	100
17.	UCAE31	Statistical Methods	4	3	25	75	100
18.	UCAN31	Business Automation Lab	2	2	25	75	100
19.	UCAS31	Business Automation Lab	2	2	25	75	100

Total Marks	600	600	700	800	700	800	4200

SCHEME OF EXAMINATION

Internal (Theory)	-	25
Test	-	15
Attendance	-	5
Assignment / Technical Quiz	-	5
Total	-	25
External (Theory)	-	75

QUESTION PATTERN

1.	PART A	10*1 Marks=10 (Objective Type/Multiple Choice) 2 Question from each Unit	10
2.	PART B	5*4 Marks =20 (From each Unit Either or Choice)	20
3.	PART C	3*15 Marks =45 (Open Choice) (Any three Question out of 5,onequestion from each unit)	45
		Total	75

The Internal assessment for Practical : 25

The External assessment for Practical : 75

SEMESTER – I
PROGRAMMING IN C

Subject Code: UCAT11

Objective.

OBJ 1: To understand and develop well-structured programs using C language.

OBJ 2: To learn the basic data structures through implementing in C language.

Course Outcomes.

CO 1: Problem solving through computer programming.

CO 2: Ability to use and deal with different memory allocation & input/output methods.

CO 3: To help students to understand the implementation of C language and be able to implement, test, debug, and document programs in C.

UNIT I.

BASICS OF C PROGRAMMING

Introduction to programming paradigms - Structure of C program - C programming: Data Types - Storage classes - Constants - Enumeration Constants - Keywords - Operators: Precedence and Associativity - Expressions - Input/output statements, Assignment statements - Decision making statements - Switch statement - Looping statements - Pre-processor directives - Compilation process.

UNIT II :

ARRAYS AND STRINGS

Introduction to Arrays: Declaration, Initialization - One dimensional array - Example Program: Computing Mean, Median and Mode - Two dimensional arrays - Example Program: Matrix Operations (Addition, Scaling, Determinant and Transpose) - String operations: length, compare, concatenate, copy - Selection sort, linear and binary search

UNIT III.

FUNCTIONS AND POINTERS

Introduction to functions: Function prototype, function definition, function call, Built-in functions (string functions, math functions) - Recursion - Example Program: Computation of Sine series, Scientific calculator using built-in functions, Binary Search using recursive functions - Pointers - Pointer operators - Pointer arithmetic - Arrays and pointers - Array of pointers - Example Program: Sorting of names - Parameter passing: Pass by value, Pass by reference - Example Program: Swapping of two numbers and changing the value of a variable using pass by reference

UNIT IV.

STRUCTURES

Structure - Nested structures - Pointer and Structures - Array of structures - Example Program using structures and pointers - Self-referential structures - Dynamic memory allocation - typedef

UNIT V:

FILE PROCESSING

Files - Types of file processing: Sequential access, Random access - Sequential access file - Example Program: Finding average of numbers stored in sequential access file - Random access file - Example Program: Transaction processing using random access files - Command line arguments.

TEXT BOOKS:

1. ReemaThareja, —Programming in C, Oxford University Press, Second Edition, 2016.
2. Kernighan, B.W and Ritchie,D.M, —The C Programming language, Second Edition, Pearson Education, 2006

REFERENCES:

1. Paul Deitel and Harvey Deitel, "C How to Program", Seventh edition, Pearson Publication
2. Juneja, B. L and Anita Seth, "Programming in C", CENGAGE Learning India pvt. Ltd., 2011
3. PradipDey, ManasGhosh, "Fundamentals of Computing and Programming in C", First Edition, Oxford University Press, 2009.
4. Anita Goel and Ajay Mittal, "Computer Fundamentals and Programming in C", Dorling Kindersley (India) Pvt. Ltd., Pearson Education in South Asia, 2011.
5. Byron S. Gottfried, "Schaum's Outline of Theory and Problems of Programming with C", McGraw-Hill Education, 1996.

COMPUTER FUNDAMENTALS & PROBLEM SOLVING

Subject Code: UCAT12

Objective.

OBJ 1: To understand computer programming and its roles in problem solving.

OBJ 2: Students will learn the concept of flow of control and program structures

Course Outcomes.

CO 1: Solve Programming problems using procedural approach

CO 2: Specify, trace, and implement programs written in a contemporary programming language that solve a stated problem in a clean and robust fashion

UNIT – I:

Fundamentals .Introduction to Computers –Generations of Computers –Types of Computers – Advantages of Computer –Characteristics of Computer –Limitations of Computer – Types of Languages

Unit II:

Block diagram of a Computer –Input Devices –Output devices–Storage device: Ram, Rom – Comparison b/w Ram and Rom –Secondary Storage devices – Types of Software

UNIT III:

Data Representation and basic Computer Arithmetic: Number systems, complements, fixed and floating point representation, character representation, addition, subtraction, magnitude comparison.

UNIT – IV: Problem Solving

Algorithm: Introduction – Types of Algorithm (Sequence, Branch and Loop) – Properties – Examples of Algorithm.

Pseudo code: Introduction – Keywords – Assignment – Conditional Statements – Loop Structures – Command & Statements with examples – Rules – Merits & Demerits.

Flowchart: Introduction – Symbols – Assignment – Conditional Statements – Loop Structures – Command & Statements with examples – Rules – Merits & Demerits.

Unit V : Networks

Definition – Features of network –network topologies –LAN –WAN –MAN–Comparison between LAN &WAN –Introduction to Internet –History of Internet –Uses of Internet

Reference Books:

1. P. K. Sinha&PritiSinha , “Computer Fundamentals”, BPB Publications, 2007.
2. Dr. Anita Goel, Computer Fundamentals, Pearson Education, 2010.

3. Alexis Leon, Fundamentals of Information Technology, Vikas Publication.

DIGITAL PRINCIPLES

Subject Code: UCAA11

Objective:

OBJ 1: To develop background knowledge as well as core expertise in Digital principles and digital system design

OBJ 2: To be trained on combinational circuits and sequential circuits

Learning Outcomes:

CO 1: The operation of latches, flip-flops, counters, registers, and register transfers

CO 2: To design two-level logic functions with AND, OR, NAND, NOR and XOR gates with minimum number of gate delays or literals

CO 3: To design and implement synchronous and asynchronous sequential circuits

UNIT I.

Number Representation–Number System: Binary, Hexadecimal–Octal Codes–BCD–Excess–3–Gray Code–ASCII–EBCDIC–Binary Arithmetic–1’s Complement–2’s Complement Representation–Error Detecting Codes–Hamming Codes.

UNIT II.

Introduction–Boolean Algebra– Demargon’s Theorem–Sum Of Product method–Product of Sum method–Karnaugh Map.

UNIT III.

Introduction – Logic Gates – OR – AND – NOT – NAND – NOR – Universal Gates – EX – OR & EX–NOR Gates.

UNIT IV.

Decoder – Encoder – Multiplexer – Demultiplexer – Half Adder – Full Adder – Half Subtractor – Full Subtractor.

UNIT V.

Flip–Flops – S–R Flip–flop – J–K Flip Flops – T Flip Flop – D Flip Flop – Counter: Ring Counter – Register – Shift Register.

Text Books:

1. Digital Principles and Applications–Albert Paul Malvino & Donald P.Leach–IV Edition–Tata McGraw Hill Company Limited.

2. Digital Circuits & Design–S.Salivahanan, S.Arivazhagan–II Edition–Vikas Publication

Reference Book

1. Digital Principles & System Design – P.S.Manoharan–Revised Edition–Charulatha Publication.

SEMESTER – II
PROGRAMMING USING C++

Subject Code: UCAT21

Objective.

OBJ 1: To develop students' knowledge and understanding of the fundamental principles of data structures.

OBJ 2: To build up students' capacity to evaluate different algorithmic techniques and to write programs for developing simple applications using C++.

Course Outcomes.

CO 1: Describe the basic concepts of OOPs and operations on arrays, lists, stacks and queue data structures

CO 2: Develop an efficient algorithm of a particular problem domain with respect to the choice of data structures.

CO 3: Translate the algorithms to application written in C++.

UNIT –I. Object Oriented Methodology, Functions and Classes and Objects.

Object Oriented Methodology: Basic Concepts of OOP. Advantages and Application of OOPs, Procedural Programming Vs. OOP.

Functions: Inline Function, Default and Const Arguments, Function Overloading, Manipulators and Enumeration.

Classes and Objects: Specifying a Class, Creating Objects, Private & Public Data Members and Member Functions, Defining Inline Member Functions, Static Data Members and Member Functions. Arrays within Class, Arrays of Objects, Objects as Function Arguments, Returning Objects.

UNIT –II. Constructors, Destructors and Operators Overloading.

Constructors and Destructors: Introduction, Parameterized Constructors, Multiple Constructors in a Class, Constructors with Default Arguments, Dynamic Initialization of Objects, Copy Constructors, Dynamic Constructors, Const Objects, Destructors

Operator Overloading: Definition, Unary and Binary Overloading, Rules for Operator Overloading,

UNIT –III. Inheritance, Pointers Virtual & Friend functions.

Inheritance. Defining Derived Classes, Types of Inheritance, Constructors and Destructors in Derived Classes.

Pointers: Pointer to Objects, this Pointer, New and Delete Operators, Virtual Function, Friend Functions. Managing Console I/O operations.

UNIT – IV. Sequential Representations of lists.

Stacks, Queues and their applications. Lists: Linked Representation – Linear linked lists. Circular linked lists. Doubly linked lists. Operations on all types of lists and Applications.

UNIT –V. Trees.

Binary Trees, Traversals of binary trees, Structural properties of binary trees.

Binary Search Trees: Search, Insertion and Deletion algorithms, Structural properties. Threaded Binary trees.

Balanced Binary Search Trees: AVL tree, B-trees, B+- trees.

PROGRAMMING IN C & C++ LAB

Subject Code: UCAP21

Course Outcome:

CO1: Ability to use different memory allocation methods

CO2: Ability to deal with different input/output methods

CO3: To understand how C++ improves C with object-oriented features.

CO4: To learn how to write inline functions for efficiency and performance.

PROGRAMMING IN C LAB

1. Simple Programs
2. Arrays
3. Functions
4. Pointers
5. Files

PROGRAMMING IN C++ LAB

1. Simple Programs
2. Call by Value and Call by Reference Method
3. Operator Overloading
4. Program using Polymorphism
5. Program using Inheritance

VISUAL BASIC Lab

Subject Code: UCAA21

Course Outcome.

CO1: Demonstrate knowledge of programming terminology and how applied using Visual Basic (e.g., variables, selection statements, repetition statements, etc.)

CO2: Develop a Graphical User Interface (GUI) based on problem description.

Program List.

1. Simple Arithmetic Operations.
2. Picture slide show
3. Building a Color Panel for Red, Green and Blue using Scroll bars
4. Math functions.
5. String Functions
6. Program to perform an animation of a picture using Timer Control.
7. Create a "Text Styler" with font, Size and Style utilities using Rich Text Box.
8. Simulating Calculator using control arrays.
9. Database creation using Data Manager.
10. Program to prepare a payroll.
11. Program to prepare an electricity bill.
12. Program for quiz.

SEMESTER – III

RDBMS

Subject Code: UCAT31

Objective.

OBJ1: Learn and practice data modeling using the entity-relationship and developing database Designs.

OBJ2: Understand the needs of database processing and learn techniques for controlling the consequences of concurrent data access.

Course Outcomes.

CO1: Understand, appreciate and effectively explain the underlying concepts of database technologies.

CO2: Declare and enforce integrity constraints on a database using a state-of-the-art RDBMS and Programming PL/SQL including stored procedures, stored functions, cursors, packages.

Unit I

Introduction to database management System – Database Terminology – Distributed and Centralized Database – Traditional approach to data files – Data Models: Network, Hierarchical, and Relational data models.

Unit II

Relational Model : Characteristics of Relational Model – Normalization: First Normal Form, Second Normal Form, Third Normal Form, Boyce – Codd Normal Form – Keys – Integrity Rules – Relational Operations : Union, difference, Intersection, Product, Division, Projection, Selection, Join.

Unit III

Introduction to SQL, DDL, DML, and DCL statements, Creating Tables, Adding Constraints, Altering Tables, Update, Insert, Delete & various Form of SELECT- Simple, Using Special Operators for Data Access. Aggregate functions, Joining Multiple Tables (Equi Joins), Joining a Table to itself (self Joins) Functions.

Unit IV

Data Constraints – Introduction, advantages and disadvantages - Type of data constraints – NOT NULL, UNIQUE, PRIMARY KEY, FOREIGN KEY and CHECK - Modifying constraints, working with data dictionary and use of USER_CONSTRAINTS

Functions – Introduction, merits and demerits - Types of functions: Scalar: Numeric functions (ABS, FLOOR, MOD, POWER, ROUND, SIGN, SQRT and TRUNC), Character functions (CHR, ASCII, CONCAT, INITCAP, LOWER, SUBSTR, TRIM, UPPER), Date functions (ADD_MONTHS, LAST_DAY, NEXT_DAY, MONTHS_BETWEEN), Conversion functions (TO_NUMBER, TO_CHAR and TO_DATE) - Aggregate: AVG, COUNT, MAX, MIN, SUM Miscellaneous – NVL, DECODE, COALESCE.

Unit V

Introduction to PL/SQL (blocks of PL/SQL, Variables, Constants) – Control Structures –Functions – Cursor and Triggers.

Text Books.

1. Elmasri&Navathe, Fundamentals of Database systems, Addison &Weisely, New Delhi.
An introduction to Database Systems :Bipin C. Desai, GalgotiaPoblications Pvt. Ltd.
2. Ivan Bayross : SQL,PL/SQL The programming language of Oracle, 3rd revised edition, BPB Publications.
3. Kevin Loney, George Koch, Oracle9i The Complete Reference , Oracle Press.

References.

1. H. F. Korth& A. Silverschatz, Database Concepts, Tata McGraw Hill, New Delhi.
2. C. J. Date, Database Systems, Prentice Hall of India, New Delhi.
3. Oracle Developer 2000 by Ivan Bayross, BPB Publications.
4. Understanding Database Management System : S. Parthsarthy and B.W.Khalkar, First edition – 2007, Master Academy.
5. P. S. Deshpande : SQL/PLSQL for Oracle9i, dreamtech press, reprint edition 2009.

RDBMS LAB

Subject Code: UCAA32

Course Outcomes.

CO1: To become familiar with SQL fundamental Concepts.

CO2: To know the connectivity of databases with controls(DAO,ADO & RDO)

Lab Program.

1. Program using Conditional Controls, Iterative Controls & Sequential Controls.
2. Programs using Exception Handling.
3. Programs using Explicit Cursors & Implicit Cursors.
4. Programs using PL/SQL Tables & Records.
5. Programs using Database Triggers.
6. Programs to design Procedures using In, Out, Inout Parameter.
7. Program to design Procedure using Functions.
8. Programs to design Procedures using Packages.
9. Program using ADO, DAO & RDO Connectivity.

STATISTICAL METHODS

Subject Code: UCAE31

Objective.

OBJ1: To have the versatility to work effectively in a broad range of analytic, scientific, government, financial, health, technical and other positions.

OBJ2: To have a broad background in Mathematics and Statistics

Course Outcomes

CO1: recognize the importance and value of mathematical and statistical thinking, training, and approach to problem solving, on a diverse variety of disciplines.

CO2: be familiar with a variety of examples where mathematics or statistics helps accurately explain abstract or physical phenomena.

Unit – I.

Frequency distribution: Measure of Central Tendency – Arithmetic Mean – Median – Mode – Geometric Mean – Harmonic Mean.

Unit – II.

Curve Fitting – Principles of Least Square – Correlation – Rank Correlation.

Unit – III.

Random Variables – Mathematical Expectations – Moment Generating Functions – Properties of MGF – Cumulant generating function – Properties of cumulant generating function.

Unit – IV.

Binomial Distribution – Poisson Distribution – Normal Distribution (Problems only) – Some more continuous distribution.

Unit – V.

χ^2 – Distribution - χ^2 Test - χ^2 test to test the goodness of fit – Test for independence of attributes.

Text Book.

1. “Statistics” – S. ArumugamIssac, New Gamma Publishing House, Palayamkottai.

Reference.

1. “Element of Mathematical Statistics” – S.C.Gupta, V.K.Kapoor, Sultan Chand Sons.

NME – BUSINESS AUTOMATION LAB

Subject Code: UCAN31

Course Outcomes:

CO1: To perform documentation.

CO2: To perform accounting operations.

CO3: To perform presentation skills.

MS–WORD

1. Create an Official Letter
2. Create an Order letter in the company Letter Head
3. Create a Simple Newsletter for your department
4. Create the Mark sheet for 15 students and find the total using table formula.
5. Create your resume
6. Create a Greeting Card for any Function
7. Create a Mail Merge Letter
8. Create a Macro for inserting a picture and formatting the text

MS–EXCEL

1. Create a Worksheet with 10 Students Record and find the sum and average.
2. Create a Worksheet with 15 Employee Records and find their Gross Pay with the following Calculation.
DA (40% of Basic Pay)
HRA (45% of Basic Pay)
PF (25% of Basic Pay)
Gross Pay= Basic Pay + DA + HRA – PF
3. Create a Worksheet with 10 Students Record to create a Result Sheet.
4. Create a Worksheet with a Bar Chart to highlight the Result analysis of the department for 5 years.
5. Create a Worksheet with a Pie Chart to show the usage of various Social Media in your area and give legends.

MS–POWERPOINT

1. Create a slideshow with transitions.
2. Create a slideshow by using pictures, audio & video files

SBE – BUSINESS AUTOMATION LAB

Subject Code: UCAS31

Course Outcomes:

CO1: To perform documentation.

CO2: To perform accounting operations.

CO3: To perform presentation skills.

MS–WORD

1. Create an Official Letter
2. Create an Order letter in the company Letter Head
3. Create a Simple Newsletter for your department
4. Create the Mark sheet for 15 students and find the total using table formula.
5. Create a Memo
6. Create your resume
7. Create a Greeting Card for any Function
8. Create a Cover page of your project record
9. Create a Mail Merge Letter
10. Create a Macro for inserting a picture and formatting the text

MS–EXCEL

1. Create a Worksheet with 10 Students Record and find the sum and average.
2. Create a Worksheet with 15 Employee Records and find their Gross Pay with the following Calculation.
DA (40% of Basic Pay)
HRA (45% of Basic Pay)
PF (25% of Basic Pay)
Gross Pay= Basic Pay + DA + HRA – PF
3. Create a Worksheet with 10 Students Record to create a Result Sheet.
4. Create a Worksheet with a Bar Chart to highlight the Result analysis of the department for 5 years.
5. Create a Worksheet with a Pie Chart to show the usage of various Social Media in your area and give legends.
6. Create a Worksheet to import data from Database and do any two calculations on them.
7. Create a Macro which creates a line chart using the data in the worksheet.

MS–POWERPOINT

1. Create a slideshow with transitions.
2. Create a slideshow by using pictures, audio & video files

SEMESTER – IV
PROGRAMMING IN JAVA

Subject Code: UCAT41

Objective.

OBJ1: knowledge of object-oriented paradigm in the Java programming language.

OBJ2: the use of Java in a variety of technologies and on different platforms.

Course Outcomes.

CO1: Knowledge of the structure and model of the Java programming language.

CO2: Use the Java programming language for various programming technologies.

Unit I.

Introduction to Java: Features of Java, JDK Environment.

Object Oriented Programming Concept Overview of Programming, Paradigm, Classes, Abstraction, Encapsulation, Inheritance, Polymorphism, Difference between C++ and JAVA.

Java Programming Fundamental .Structure of java program, Data types, Variables, Operators, Keywords, Naming Convention, Decision Making (if, switch), Looping(for, while) ,Type Casting.

Unit II.

Classes and Objects: Creating Classes and objects, Memory allocation for objects, Constructor, Implementation of Inheritance, Implementation of Polymorphism, Method Overloading, Method Overriding, Nested and Inner classes.

Arrays and Strings. Arrays, Creating an array, Types of Arrays, String class Methods, String Buffer methods.

Unit III :

Abstract Class, Interface and Packages: Modifiers and Access Control, Abstract classes and methods, Interfaces, Packages Concept, Creating user defined packages

Unit IV:

Exception Handling: Exception types, Using try catch and multiple catch, Nested try, throw, throws and finally, Creating User defined Exceptions.

File Handling: Byte Stream, Character Stream, File IO Basics, File Operations, Creating file, Reading file, Writing File.

Unit V:

Applet Programming: Introduction, Types Applet, Applet Life cycle, Creating Applet, Applet tag.

Text Book.

1. Dr.K.Somasundram, Programming in Java 2, Jaico Publishing House –2008.
2. Herbert schildt, The Complete Reference –Java 2, 4th edition, Tata McGraw Hill 2001. (Unit 3,4,&5)
3. Er.V.K.Jain, Programming Java server Pages & servlets – dream Tech Press 2000.

Reference Book.

1. Steven Holzner, JAVA 2 Swing, Servlets JDBC, Java Beans Programming, Dream Tech Press Revised Edition.
2. Jamie Jaworski, Java 2 Platform unleashed, Techmedia.

PROGRAMMING IN JAVA LAB

Subject Code: UCAP42

Course Outcomes:

CO1: To use the Java programming language for various programming technologies.

CO2: To develop software in the Java programming language.

Lab Program.

1. WAP to find the largest of n natural numbers.
2. WAP to find whether a given number is prime or not.
3. Write a menu driven program for following:
 - a. Display a Fibonacci series
 - b. Compute Factorial of a number
 - c. WAP to check whether a given number is odd or even.
 - d. WAP to check whether a given string is palindrome or not.
4. WAP to print the sum and product of digits of an Integer and reverse the Integer.
5. Write a program to create an array of 10 integers. Accept values from the user in that array. Input another number from the user and find out how many numbers are equal to the number passed, how many are greater and how many are less than the number passed.
6. Write a program that will prompt the user for a list of 5 prices. Compute the average of the prices and find out all the prices that are higher than the calculated average.
7. Write a program in java to input N numbers in an array and print out the Armstrong numbers from the set.
8. Write java program for the following matrix operations:
 - a. Addition of two matrices
 - b. Summation of two matrices
 - c. Transpose of a matrix
 - d. Input the elements of matrices from user.
9. Write a java program that computes the area of a circle, rectangle and a Cylinder using function overloading.
10. Write a Java for the implementation of Multiple inheritance using interfaces to calculate the area of a rectangle and triangle.
11. Write a java program to create a frame window in an Applet. Display your name, address and qualification in the frame window.
12. Write a java program to draw a line between two coordinates in a window.
13. Write a java program to display the following graphics in an applet window.
 - a. Rectangles
 - b. Circles
 - c. Ellipses
 - d. Arcs

e. Polygons

14. Write a program that reads two integer numbers for the variables a and b. If any other character except number (0-9) is entered then the error is caught by NumberFormatException object. After that ex.getMessage() prints the information about the error occurring causes.

15. Write a program for the following string operations:

a. Compare two strings

b. Concatenate two strings

c. Compute length of a string

16. Create a class called Fraction that can be used to represent the ratio of two integers. Include appropriate constructors and methods. If the denominator becomes zero, throw and handle an exception.

Tally Lab

Subject Code: UCAA42

Course Outcome.

CO1: Knowledge about the need for Tally Accounting Software

CO2: Familiar in basic operations such as create/load the company, group, security control, back-up etc.

Lab Program.

1. Creating a company in Tally.ERP9
2. Single & Multi Ledger Creation
3. Single & Multi group Creation
4. Contra Voucher
5. Payment Voucher
6. Receipt Voucher
7. Purchase Voucher
8. Sales Voucher
9. Debit Not
10. Balance Sheet
11. Profit and Loss Account
12. Trial Balance

ACCOUNTING AND FINANCIAL MANAGEMENT

Subject Code: UCAE42

Objective.

OBJ1: To know about the preparation of final Accounts.

OBJ2: To know a brief of accounting procedures.

Course Outcomes.

CO1: Understanding the need of Accounts of an organization for decision making.

CO2: Knowledge of accessing the account information.

Unit – I

Origin and Growth of accounting: Meaning – objectives & Classifications, uses of accounting information – Limitations.

Double Entry System: Definitions – Rules, Merits & Demerits.

Unit – II

Journal – Ledger – Posting Journal to Ledger.

Unit – III

Final accounts of Sole Trading Concerns: Trail Balance – Profit and Loss account – Balance Sheet.

Unit – IV

Introduction to Financial Management – Origin – Scope – Types.

Unit – V

Financial statement analysis & interpretation: Accounting ratio their significance, Utility & Limitations, Analysis for Inequality, Profitability & Solvency.

Text Books.

1. Double entry book keeping – T.S.Grewal
2. Advanced Accountancy – R.L.Gupta&M.Radhasamy
3. Advanced Accountancy – M.A.Arulanantham&S.Raman
4. Advanced Accountancy – S.N.Maheswari
5. Advanced Accountancy – M.C.Shukhala&T.S.Grewal

Reference Books.

1. Accounting – R.L.Gupta&RadhaSwamy.
2. Financial Management – Khan & Jain

NME – Desk Top Publishing (DTP LAB)

Subject Code: UCAN42

Course Outcomes:

CO1: To create and print a multi-page document which incorporates a variety of visual elements including text, graphics, columns and formatting other than the default settings, using advanced layout principles e.g. newsletter, brochure, advertisement or magazine.

CO2: To understand the difference between DTP and how it differs from word processing procedures

CO3: To acquire knowledge of typography e.g. font size, style, kerning, alignment, hyphenation and line spacing

Lab Exercises:

Page Maker:

1. Letter Pad
2. Calendar
3. Flow chart

Corel Draw:

1. Rangoli
2. Logo Design
3. Power Clip

Photoshop:

1. Passport size photo
2. Conversion of Color image to Black & White
3. Change of Background
4. Light effect
5. Rain Effect
6. Text effect
7. Visiting Card
8. Certificate

SBE – PYTHON LAB

Subject Code: UCAS42

Course Outcomes:

CO1: To Master an understanding of scripting and the contributions of scripting languages.

CO2: To Master an understanding of Python especially the object-oriented concepts.

Unit I.

Overview of Programming: Structure of a Python Program, Elements of Python.

Introduction to Python: Python Interpreter, Using Python as calculator, Python shell, Indentation. Atoms, Identifiers and keywords, Literals, Strings, Operators (Arithmetic operator, Relational operator, Logical or Boolean operator, Assignment, Operator, Ternary operator, Bit wise operator, Increment or Decrement operator).

Unit II.

Creating Python Programs: Input and Output Statements, Control statements (Looping- while Loop, for Loop , Loop Control, Conditional Statement- if...else, Difference between break, continue and pass).

Unit III.

Structures: Numbers, Strings, Lists, Tuples, Dictionary, Date & Time, Modules, Defining Functions, Exit function, default arguments.

LAB Exercises

1. Write a menu driven program to convert the given temperature from Fahrenheit to Celsius and vice versa depending upon user's choice.
2. WAP to calculate total marks, percentage and grade of a student. Marks obtained in each of the three subjects are to be input by the user. Assign grades according to the following criteria.
Grade A: Percentage ≥ 80
Grade B: Percentage ≥ 70 and < 80
Grade C: Percentage ≥ 60 and < 70
Grade D: Percentage ≥ 40 and < 60
Grade E: Percentage < 40
3. Write a menu-driven program, using user-defined functions to find the area of rectangle, square, circle and triangle by accepting suitable input parameters from user.
4. WAP to find the given number is odd or even.
5. WAP to display the first n terms of Fibonacci series.
6. WAP to find factorial of the given number.
7. WAP to find sum of the following series for n terms: $1 - 2/2! + 3/3! - \dots - n/n!$
8. WAP to calculate the sum and product of two compatible matrices.
9. WAP to compute the sum $1 + 2 + 3 + 4 + 5 + 6 + 7 + 8 + 9 + 10$ recursively.
10. WAP to generate password.

8. <http://www.ibiblio.org/g2swap/byteofpython/read/>

SEMESTER – V

COMPUTER ARCHITECTURE

Subject Code: UCAT51

Objective.

OBJ1. Review historical development of computer systems

OBJ2. Identify design levels for computer system development

Course Outcomes.

CO1. To apply the knowledge of performance metrics to find the performance of systems.

CO2. To identify and deal with high performance architecture design

UNIT I.

Introduction. Logic gates, Boolean algebra, combinational circuits, circuit simplification, flip-flops and sequential circuits, decoders, multiplexers, registers, counters and memory units.

UNIT II.

Basic Computer Organization and Design. Computer registers, bus system, instruction set, timing and control, instruction cycle, memory reference, input-output and interrupt.

UNIT III.

Central Processing Unit. Register organization, arithmetic and logical micro-operations, stack organization, micro programmed control.

UNIT IV.

Programming the Basic Computer. Instruction formats, addressing modes, instruction codes, machine language, assembly language, input output programming.

UNIT V.

Input-output Organization. Peripheral devices, I/O interface, Modes of data transfer, direct memory access.

Text Book.

1. M. Mano, Computer System Architecture, Pearson Education 1992.
2. A. J. Dos Reis, Assembly Language and Computer Architecture using C++ and JAVA, Course Technology, 2004
3. W. Stallings, Computer Organization and Architecture Designing for Performance, 8th Edition, Prentice Hall of India ,2009
4. Digital Design, M.M. Mano, Pearson Education Asia, 1979

OPERATION RESEARCH

Subject Code: UCAT52

Objective.

OBJ1. student will be able to Critically evaluate the design, including sampling **techniques**, of a statistical study.

OBJ2. Effectively perform statistical computations and display numerical and graphical summaries.

Course Outcomes

CO1. Able to use of simplex method to solve optimization problems.

CO2. Able to solve the concept of duality and solve Shortest route problem.

Unit. I

Definition of OR – General methods for solving OR models – Main characteristics of OR – Applications of OR.

Unit. II

Linear programming problems – Mathematical formation of LPP – Slack and surplus variables – Graphical solutions for LPP.

Unit. III

Simplex method – Computational procedure – Artificial variable techniques – two phase method – Duality in Linear programming.

Unit. IV

Mathematical formula of Assignment problem – Method for solving the assignment problem.

Unit. V

Mathematical formula of Transportation problem method for obtaining an Initial feasible solution – Optimum solution T.P – Degeneracy in T.P – Unbalanced T.P

Text book.

Operations Research– S.D Sharma, KedarNath Ram Nath& Co Publications, Sixteenth Revised Edition 2009.

Reference books.

1. Operations Research– KantiSwarup, P.K Gupta &Manmohan, Sultan Chand &Sons publications, Sixteenth Revised Edition 2009.
2. Resource Management Techniques – Prof.V.Sundaresan, K.S.Ganapathy Subramanian, K.Ganesan, AR Publications Revised Edition 2010.

SYSTEM SOFTWARE

Subject Code: UCAT53

Objective.

OBJ1: Understand the basic knowledges of all the system softwares like Operating Systems, Compiler, Assembler, Linker and Loader.

OBJ3: Understand the basic functions of the system softwares.

Course Outcomes.

CO1: The functions and design options of Assemblers.

CO2: The design options and simple functions of Loader, Compilers and operating systems

UNIT –I

Basic Concepts of System software – System software and Machine Architecture–SIC machine–CISC machine –RISC machine

UNIT –II ASSEMBLERS

Basic Assembler Function–Dependent Assembler feature– Independent Assembler feature – Design Option.

UNIT –III LOADER & LINKER

Basic Loader Function–Dependent loader feature– Independent loader feature – Design Option.

UNIT –IV COMPILER

Basic Compiler Function–Dependent compiler feature– Independent compiler feature – Design Option.

UNIT –V OS

Basic OS Function–OS Types –OS feature – Design Option–Interactive Debugging System.

Text Book.

1. System software, An Introduction to System Program – Leland L.Beck, D.Manjula–3rd Edition 2007.
2. System software, An Introduction to System Program – Leland L.Beck–3rd Edition 2007.

SOFTWARE ENGINEERING

Subject Code: UCAT54

Objective.

OBJ1: It seeks to complement this with a detailed knowledge of techniques for the analysis and design of complex software intensive systems.

OBJ2: Be successful professional in the field with solid fundamental knowledge of Software Engineering.

Course Outcomes.

CO1: Understand the issues affecting the organization, planning and control of software--based systems development;

CO2: The ability to analyze, design, verifies, validate, implement, apply and maintain software system

UNIT I

INTRODUCTION: Software Engineering - Software Process - Generic process model - Prescriptive process model specialized, unified process - Agile development - Agile Process - Extreme Programming - Other agile Process models -Software engineering Knowledge - core Principles - Principles that guide each framework Activity.

UNIT II

REQUIREMENTS: Requirements Engineering - Establishing the Groundwork - Eliciting Requirements - Developing use cases - Building the requirements model - Negotiating, validating Requirements - Requirements Analysis -Requirements Modeling Strategies.

UNIT III

DESIGN:

MODELING WITH UML: Modeling Concepts and Diagrams-Use Case Diagrams-Class Diagrams - Interaction Diagrams-State chart Diagrams-Activity Diagrams-Package Diagrams-Component Diagrams-Deployment Diagrams-Diagram Organization-Diagram Extensions. Design Process- Design concepts: Abstraction, Architecture, patterns, Separation of Concerns, Modularity, Information Hiding, Functional Independence, Refinement, Aspects, Refactoring, Object Oriented Design Concepts, Design Classes -Design Model: Data, Architectural, Interface, Component, Deployment Level Design Elements .

UNIT IV

SOFTWARE IMPLEMENTATION: Structured coding Techniques -Coding Styles-Standards and Guidelines-Documentation Guidelines-Modern Programming Language Features: Type checking-User defined data types -Data Abstraction-Exception Handling-Concurrency Mechanism.

UNIT V

TESTING AND MAINTENANCE.

TESTING: Software Quality–Software Quality Dilemma–Achieving Software Quality–Testing: Strategic Approach to software Testing–Strategic Issues–Testing: Strategies for Conventional Software, Object oriented software, WebApps–Validating Testing–System Testing–Art of Debugging.

MAINTENANCE: Software Maintenance–Software Supportability–Reengineering–Business Process Reengineering–Software Reengineering–Reverse Engineering–Restructuring–Forward Engineering–Economics of Reengineering

TEXT BOOKS

1. Roger S, Pressman “Software Engineering–A Practitioner’s Approach”, Seventh edition, Pressman, 2010.
2. Pearson Edu, “Software Engineering by Ian Sommerville”, 9th edition, 2010

COMPUTER NETWORKS

Subject Code: UCAT55

Objective.

OBJ1. Build an understanding of the fundamental concepts of computer networking.

OBJ2. Familiarize the student with the basic taxonomy and terminology of the computer networking area.

Course Outcomes.

CO1. Analyze the requirements for a given organizational structure and select the most appropriate networking architecture and technologies;

CO2. Familiarity with the basic protocols of computer networks, and how they can be used to assist in network design and implementation.

UNIT I

Basic concepts : Components of data communication, standards and organizations, Network Classification, Network Topologies ; network protocol; layered network architecture; overview of OSI reference model; overview of TCP/IP protocol suite.

UNIT II

Physical Layer : Cabling, Network Interface Card, Transmission Media Devices– Repeater, Hub, Bridge, Switch, Router, Gateway.

UNIT III

Data Link Layer : Framing techniques; Error Control; Flow Control Protocols; Shared media protocols – CSMA/CD and CSMA/CA.

UNIT IV

Network Layer : Virtual Circuits and Datagram approach, IP addressing methods – Subnetting; Routing Algorithms (adaptive and non-adaptive)

Transport Layer: Transport services, Transport Layer protocol of TCP and UDP

UNIT V

Application Layer : Application layer protocols and services – Domain name system, HTTP, WWW, telnet, FTP, SMTP

Network Security : Common Terms, Firewalls, Virtual Private Networks

Text Books.

1. B.A. Forouzan. Data Communication and Networking, 4th Edition, Tata McGraw Hill, 2007.
2. D.E. Comer, Internetworking with TCP/IP, Vol. I, Prentice Hall of India, 1998.
3. W. Stalling, Data & Computer Communication, 8th edition, Prentice Hall of India, 2006.
4. D. Bertsekas, R. Gallager, Data Networks, 2nd edition, Prentice Hall of India, 1992.

PHP WITH MYSQL – LAB

Subject Code: UCAE53

Course Outcomes

CO1: To create, translate and process HTML information using the CGI.

CO2: To retrieve, insert, update and delete data from the relational database MYSQL

Lab Programs:

1. Creating simple webpage using PHP
2. Use of conditional statements in PHP
3. Use of looping statements in PHP
4. Creating different types of arrays
5. Usage of array functions
6. Creating user defined functions
7. File manipulation using PHP
8. Creating simple applications using PHP
9. Creating simple table with constraints
10. Insertion, Updation and Deletion of rows in MYSQL tables
11. Searching of data by different criteria
12. Demonstration of joining tables
13. Usage of subqueries
14. Usage of aggregate functions
15. Working with string, numeric and date functions
16. Database connectivity in PHP with MySQL
17. Validating Input

MOBILE APPLICATIONS – LAB

Subject Code: UCAS53

Course Outcomes

CO1. Design and develop user Interfaces for the Android platform

CO2.Apply Java programming concepts to Android application development.

Lab Program.

1. .Develop an application that uses GUI components, Font and Colors
2. Develop an application that uses Layout Managers and event listeners.
3. Develop a native calculator application.
4. Write an application that draws basic graphical primitives on the screen.
5. Develop an application that makes use of database.
6. Develop an application that makes use of RSS Feed.
7. Implement an application that implements Multi-threading
8. Develop a native application that uses GPS location information.
9. Implement an application that writes data to the SD card.
10. Implement an application that creates an alert upon receiving a message.
11. Write a mobile application that creates alarm clock

SEMESTER VI
COMPUTER GRAPHICS

Subject Code: UCAT61

Objectives:

OBJ1: Know and be able to discuss hardware system architecture for computer graphics. This includes, but is not limited to: graphics pipeline, frame buffers, and graphic accelerators/co-processors.

OBJ2: Know and be able to use a current 3D graphics API .

Course Outcomes:

CO1: Be able to create images using a standard graphics API.

CO2: Show ability to use the facilities provided by a standard API to express basic transformations such as scaling, rotation, translation, reflection, shearing etc.

CO3: Demonstrate ability to implement algorithms that perform transformation and clipping operations on simple 2-dimensional and 3-dimensional objects

UNIT- I :

Introduction to computer Graphics – Video display devices– Raster scan Systems –Random Scan Systems –Output primitives : Points and Lines –Line drawing algorithm: DDA Algorithm, Bresenham’s line algorithm –Circle Generating Algorithms: Properties of Circles, Mid point Circle Algorithm,

Unit – II

Attributes of output Primitives – line attributes –Curve Attributes – Color and Grayscale style – Area filling attributes – Character attributes – Bundled attributes – Two Dimensional Geometric Transformations: Basic Transformation –Composite Transformation – Other Transformations –

Unit – III

Two Dimensional Viewing : The Viewing pipeline – Viewing Coordinates Reference Frame – Window to View port coordinate Transformation – 2D Viewing Functions.– Clipping Operations: Point Clipping –Line Clipping –Polygon Clipping – Curve Clipping – Text clipping.

Unit – IV

Three – dimensional concepts – Three dimensional display methods – parallel Projection – Perspective Projection – Depth Cueing – Visible line and surface identification – Three dimensional transformation.

Unit V:

Three Dimensional Viewing: Viewing pipeline – Viewing Coordinated – Projections – Clipping – Visible Surface Detection Algorithms – Backface detection – Depth buffer detection – A-Buffer method.

Text Book:

D.Hearn and M.P.Baker – Computer Graphics – Prentice Hall of India – 1997.

Reference Book:

W.M. Newman and R.F.Sproull – Principles of Interactive Computer Graphics – McGraw Hill International Edition – 1979.

WEB TECHNOLOGY

Subject Code: UCAT62

Objective.

OBJ1: Create adaptive web pages

OBJ2: Choose best technologies for solving web client/server problems.

OBJ3: Use JavaScript for dynamic effects.

Course Outcomes.

CO1: Student will be familiar with client server architecture and able to develop a web application using java technologies.

CO2: Students will be able to write a server side java application called JSP to catch form data sent from client and store it on database.

CO3: Students will be able to write a server side java application called Servlet to catch form data sent from client, process it and store it on database.

CO4: create and communicate between client and server using Java and create a good, effective and dynamic website.

UNIT I.

Introduction – History of the Internet – Services and Accessibility – Uses – Protocols – Internet Standards

UNIT II.

HTML – Introduction – HTML Document – Head Section – Body Section – HTML Forms – Java Script – Introduction – Language Elements – Objects of Java Script – Other Objects – Arrays.

UNIT III. Cascading Style Sheets – Advantages of CSS – Properties of Tags – Property Values – Embedded Style Sheets – External Style Sheets – Grouping – Inheritance – Class as Selector – Pseudo Classes and Pseudo Elements – Positioning – Backgrounds – Element Dimensions

UNIT IV. Servlets – Introduction – Advantages of Servlets – Servlet Life Cycle – The Servlet API – A Simple Servlet – Handling HTTP GET Requests – Handling HTTP POST Requests – Cookies – Session Tracking

UNIT V : Introduction – Advantages of JSP – Developing First JSP – Components of JSP – Reading request information – Retrieving the data posted from a HTML file to a JSP File – JSP Sessions – Cookies – Disabling Sessions

Text Book:

1. Web Technology – A Developers Perspective – N P Gopalan, J Akilandeswari, Prentice Hall of India Pvt. Ltd., New Delhi, 2008. 454

Reference Books:

1. Mastering Javascript, J Jaworkski, BPB Publications, 1999 2. Core SERVLETS AND JAVA SERVER PAGES VOLUME 1: CORE TECHNOLOGIES By Marty Hall and Larry Brown Pearson, Pearson Education India

MULTIMEDIA AND ITS APPLICATIONS

Subject Code: UCAT63

Objective.

OBJ1: Create adaptive web pages

OBJ2: Choose best technologies for solving web client/server problems.

Course Outcomes.

CO1: Graduates will successfully identify and use the elements and principles of design in multimedia.

CO2: Successful students will be able to identify terminology associated with the concepts, techniques, and processes used throughout the multimedia environment.

CO3: Present, evaluate, and communicate, or receive, constructive feedback in response to an objective set of criteria for any given work of multimedia design.

UNIT – I.

Where to use Multimedia, **Text:** About font and faces using Text in Multimedia – Hypermedia and Hypertext

Unit – II.

Images: Making Still images: Bit map, Vector Drawing, Vector drawn objects vs Bitmap – 3D Drawing and Rendering. Color: Computerized Colors – Image file formats.

Unit – III.

Sound: Digital Audio – MIDI Audio – MIDI vs Digital Audio – Audio file formats – Adding Sound to multimedia projects.

Unit – IV.

Animation and Video: Principles of Animation – Animation by Computer – Making Animation that Works.

Video : How video works and is displayed – Digital Video Containers – Shooting and editing video

Unit – V.

Making Multimedia – Stages of a Multimedia Project – What you need: The Intangibles, Hardware, Software, authoring Systems.

Text Book.

1. **Multimedia : Making it works**, 8th Edition, Tay Vaughan, Tata McGraw Hill Publications

MULTIMEDIA LAB

Subject Code: UCAP63

Course Outcomes

CO1: To develop an interactive multimedia presentation.

CO2: In designing multimedia applications.

Lab Program.

1. Procedure to create an animation to represent the growing moon.
2. Procedure to create an animation to indicate a ball bouncing on steps.
3. Procedure to simulate movement of a cloud.
4. Procedure to draw the fan blades and to give proper animation.
5. Procedure to display the background given (filename: Tulip.jpg) through your name.
6. Procedure to create an animation with the following features.
7. Procedure to simulate a ball hitting another ball.
8. Procedure to create an animated cursor using `startdrag("ss",True); mouse.hide()`
9. Procedure to design a visiting card containing atleast one Graphic and text information.
10. Procedure to take a photographic image. Give a title for the Image. Put the border. Write your names. Write the name of Institution and place.
11. Procedure to prepare a cover page for the book in your Subject area. Plan your own design.
12. Procedure to extract the flower only from given Photographic image and organize it on a background. Selecting your own background for organisation.
13. Procedure to display the background given (filename: Garden.jpg) through your name using mask.
14. Procedure to change a circle into a square using flash.

WEB TECHNOLOGY LAB

Subject Code: UCAP64

Objective.

OBJ1: Create adaptive web pages

OBJ2: Choose best technologies for solving web client/server problems.

Course Outcomes.

CO1: Apply the knowledge of the internet and related internet concepts that are vital in understanding web application development and analyze the insights of internet programming to implement complete application over the web.

CO2: Understand, analyze and apply the role of markup languages in the workings of the web and web applications.

CO3: Automate the real time problems by developing & analyzing a web project and identify its elements and attributes in comparison to traditional projects.

Lab Program.

- Creation of HTML pages with frames, links, tables and other tags
- APPLYING STYLE TO AN HTML PAGE USING CSS
- Java script for Displaying and Comparing Date & Form Validation
- Online Applications using JSP
- Servlet program using HTTP Servlet
- Online application with data access
- Creation of XML document
- XML document and DTD

SOFTWARE TESTING LAB

Subject Code: UCAS64

Objectives.

OBJ1.To apply various techniques and to detect the errors in the software

OBJ2.To generate and apply the test cases using the automated testing tool

OBJ3.To learn the functionality of automated testing tools to apply in the specialized environment

Course Outcomes.

CO1.Able to test the software by applying various testing techniques.

CO2.Able to debug the project and to test the entire computer based systems at all levels.

CO3.Able to evaluate the web applications using bug tracking tools.

CO4.Able to apply quality and reliability metrics to ensure the performance of the software.

Lab Program.

1. Understand the automation testing approach.
2. Using Selenium IDE, Write a test suite containing minimum 4 test cases for arithmetic operations.
3. Conduct a test suite for any two web sites.
4. Install Selenium server and demonstrate it using a script in Java/PHP by developing a web page which calculates the GCD of 2 numbers.
5. Write and test a program to login a specific web page.
6. Write and test a program to update 10 student records into table into Excel file.
7. Write and test a program to select the number of students who have scored more than 60 in any one subject (or all subjects).
8. Write and test a program to provide total number of objects present available on the page.
9. Write and test a program to get the number of list items in a list combo box using HTML.
10. Write and test a program to count number of check boxes on the page checked and unchecked count using Visual Basic script.
